WHO WE ARE

One Tribe Post is the post production arm of the One Tribe family. At its heart is One Tribe TV, a television production company that has been dedicated to creating innovative and inspirational high-end factual content for major UK and international broadcasters for almost a decade.

One Tribe prides itself on employing a highly talented core team. We are able to produce and deliver everything from fast-turnaround films for The One Show to high-budget UHD documentaries, spanning multiple genres from historical drama and popular factual to natural history.

As a one-stop shop with tried and tested final post and TX delivery, we are now ready to bring One Tribe Post to the market. In a time when post production fees are rising, we believe One Tribe Post can offer a cost-effective solution from a company that genuinely understands the demands of production.

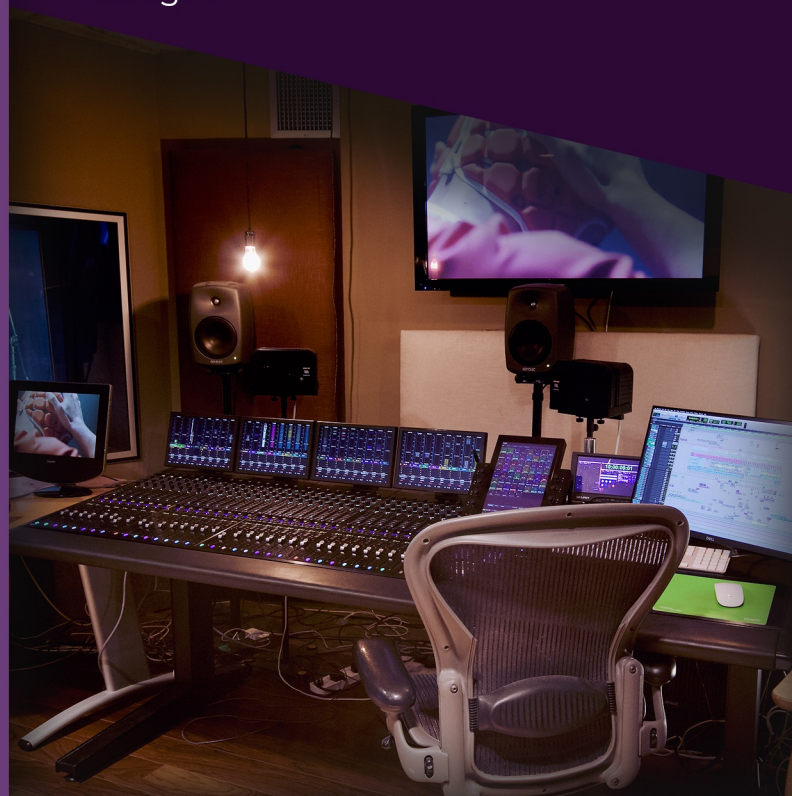

YOUR LOCAL ONE-STOP SHOP

One Tribe Post is more than a normal post house. We offer unique, flexible and cost-effective ways to support your productions. We have a **variety of edit suites available to hire** - from our premium viewing suite for clients, execs or commissioners, to our collection of smaller offline suites. Whatever your budget, premium comes as a standard, as all of our suites come with **top-of-the-range Macs, calibrated grading monitors and microphones**. We have seven suites in the heart of the **beautiful Georgian city of Bath** (1 hour 15 mins from London) and a further two edit suites across the border in the **historic Welsh market town of Chepstow**, which is easily accessible from Cardiff and Bristol. Needless to say, we have the nations and regions covered. If you are based inside the M25, our **nations and regions status** can assist you with outside London spend that may be required by your commissioning broadcasters. With our **media shuttle service**, we are still able to feel like your local post house - wherever you are in the world. However, if you would like to deliver us hard drives, we have **on-site safes** to ensure your data is protected. We can even offer your team members desk space with kitchen facilities, should you prefer a face-to-face collaboration.

Whether you need simple sync pulls, offline dry or wet edit hire, online, grading, dubbing, graphic design, animation or even production and camera support for last-minute filming, we can support you at any stage of production. We have a full-time staff of highly experienced online and offline editors and colourists, edit assistants, an in-house graphics department, camera kit and crew and a partner team of dubbing mixers and sound designers at Cranc in Cardiff.

From ingest to channel or client delivery, our post production team can take care of everything. We offer bespoke services to completely fit your needs and our rates are competitive. Although we pride ourselves on being cost-effective, we ensure quality is built into the ethos of everything we do. We have a track record of delivering quality across all genres, from 4K blue chip natural history to animation-based graphics for BBC Learning. We are also the go-to edit service for over 100 One Show VTs annually. Our team is dedicated to making sure you deliver the best programme possible on time and on budget.

NO HIDDEN COSTS

For us, transparency is key - we believe that extra costs shouldn't surface further down the line. Therefore, previously costly and time-consuming processes like ingest and transcripts are **included in up-front quotes**, and viewing layouts start from as little as £19.

Additionally, we offer a **free workflow consultation** at the beginning of the project to ensure needs and expectations are met and to create a step-by-step schedule.

At One Tribe Post, we understand that an editor's time is normally the most valuable part of the post production workflow and as such we go above and beyond to ensure that when an editor is in a suite, none of their time is wasted. Our experienced edit team are primed to be flexible; working independently or alongside a producer. This could include **full sync pulls and mapping, GV organisation, preliminary music library trawls** and even a **rough assembly** from script.

We currently employ a team of full-time editors, edit assistants, graphic designers, colourists, online editors, motion designers, and have a partner team of dubbing mixers and sound designers. By offering long, stable contracts to our in-house team, we are able to **pass on savings to our clients** and **ensure continuity** on projects that may have to stop-start or span a longer period of time than normal edit schedules.

OUR TOP SERVICES

OFFLINE

Elevate your narrative with our expert editors, skilled not only in traditional offline editing to broadcast standards, but also at crafting captivating sizzle reels and trailers. We can seamlessly manage and store your rushes on our secure in-house server, where they are indexed and organised by dedicated staff.

GRADE

Our DaVinci Suite colour grading services achieve stunning 4K visuals and vibrant HDR brilliance for a lasting impact. Our skilled team enhances every frame to elevate your project's mood and storytelling. We guarantee compliance with legal standards for UK and international deliveries, ensuring seamless distribution. From cinematic sequences to dynamic commercial content, we create visual masterpieces.

GRAPHICS

Explore our extensive portfolio of 2D and 3D graphics, encompassing maps, archive treatment, titles, and bespoke concepts. Meticulously crafted with attention to detail, each project boasts a unique, cohesive style. We pride ourselves on infusing each project with creative flair and innovative ideas that match your needs. We will organise meetings with our graphics team to discuss your project and how we can realise your vision to the highest standard,.

ONLINE (QC)

Our finishing editing services promise broadcast excellence, meeting UK and international standards. We ensure precision-engineered sound and provide Automated Quality Control (PSE and AQC) certificates for global broadcasting. Compliant with UK DPP and distributor standards, we boast a proven track record.
